

As the founding auditing firm that has performed the most CSIA audits worldwide, Exotek confirms that the following company has passed the audit requirements as established by the Control Systems Integrator Association.

Alfamation SpA

Lissone, Italy

CSIA Audit Requirements

It is proof that the CSIA Best Practices are implemented. By passing the CSIA audit, system integrators demonstrate that they meet industry standards for business and management. Technical proficiency alone is not enough. To grow and sustain a successful integration company that meets clients' current and future requirements, integrators need to develop good business and management skills, in addition to technical knowledge.

A handwritten signature in black ink, appearing to read "Don Roberts", written over a horizontal line.

Don Roberts, CSIA Auditor

AUDIT DATE: 2025/01/22
